Enhancing Customer Experience Through Cybersecurity Education:

The Cybersecurity Ambassador Program

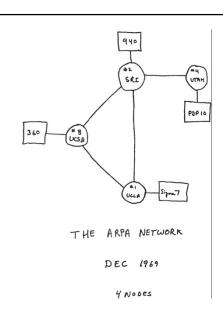

Doug Jacobson

IOWA STATE UNIVERSITY

1

Cybersecurity: The past

- Internet created in 1969
 - 4 nodes
- Firewalls in late 1980s
- IDS 1987
- Public Key encryption 1970s
- First large attack on the internet 1988
 - Only about 10,000 hosts and around 100,000 users.

IOWA STATE UNIVERSITY

Cybersecurity: The present

- Everyday there is another news headline
- Reported cyber crime netted over 12 Billion in 2023 (US)
- Estimated 30% of phishing emails are opened
- Estimated that over 90% of cyber attacks involve social engineering.

IOWA STATE UNIVERSITY

3

After decades of technology, why are things worse?

- Defense is hard (must be perfect)
- More attackers, victims, devices
- Profitable (Over 12 Billion dollars)
- •Attackers pick on the softest targets
 - As we deploy more technology and harden computer software the shift is to the people.
- Remember successful technology does not stop an attacker from attacking it just makes them change how they attack.
- We have spent decades telling the user that technology will save you.
- It is time to look at something different

IOWA STATE UNIVERSITY

Technology vs User Cycle

Tech

Users

- Helplessness
- More demand
- Resentment
- Apathy
- Techno-stress
- Less secure

- Fear
- Blame
- Security is too complex
- Non-technical user
- Promises

IOWA STATE UNIVERSITY

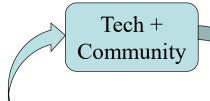

Center for Cybersecurity Innovation & Outreach

5

Technology plus Community and the User

- Increased Confidence
- Trust
- Empowered Feedback
- Increased Participation
- Enhanced Resilience
- Tech adoption

Users

- Security Culture
- Peer Support
- Inclusive Education
- **Trusted Partners**
- Empowerment

IOWA STATE UNIVERSITY

6

Cybersecurity Literacy

- People are aware, they need to be literate
- Literacy is teaching Computer Security in terms the average user will understand
- If abstracted correctly (using analogies, metaphors, and common language) practical computer security is accessible to ALL
 - By relating computer security to everyday activities.
 - By helping users understand they have a role in their own safety
 - Teach the concepts
 - For example, instead of telling them what is a good password we get them to understand how a password is used, what a password protects, and how an attacker can compromise your password.

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

7

The Cybersecurity Ambassador Program

- Long time goal to educate every Iowan about cybersecurity
 - 3 million >> 1
- This project aims to create a network of local chapters of Cybersecurity Ambassadors who can promote basic cybersecurity literacy in their communities and help prevent cyber threats such as identity theft, cyberbullying, and online scams.

IOWA STATE UNIVERSITY

Mission & Vision

CYBERSECURITY

EDUCATE EMPOWER

AMBASSADOR

- To cultivate a community of well-informed and proactive cybersecurity ambassadors who, through education and advocacy, play a pivotal role in promoting a safer and more secure digital society.
- To establish a resilient digital ecosystem where individuals, empowered with cybersecurity knowledge, collaborate to protect and enhance the security and privacy of their communities.

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

9

Structure of the program

Management

- ISU Manages the program through the "Iowa Cyber Hub"
- ISU creates, curates and manages the materials and supporting websites
- ISU recruits and helps train the ambassadors

Dual Chapter System

- Student chapters (schools, 4H, community colleges, universities)
- Community Ambassadors

Chapter Activities

•Workshops, seminars, and community events aimed at spreading cybersecurity knowledge.

IOWA STATE UNIVERSITY

Supporting Materials

- Ambassador resources
 - ISU hosted chapter pages
 - CyberEd website contains materials with teaching guides.
 - Slides, videos, infographics, etc.
 - Interactive examples (wireless security)
 - Working with CISA and other to use and enhance their content.
 - Student and community chapters also provide materials.
 - Held a showcase in the spring to solicit materials from schools

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

11

Current Status

- Pilot schools: 4 high schools last school year
 - Youth cyber summit in October

- \$50,000 private funding
- Starting external fund-raising efforts
- . Material Development:
 - Team of students working to create content.
 - Partnership with CISA

CYBERSECURITY

EDUCATE EMPOWER

Plans

- **Continue Material Development:**
 - Crowd source
- New student chapters:
 - Working with 4H, and Iowa STEM council to recruit student chapters
- On board Community Ambassadors
 - Create a community
 - Share resources
 - Speakers portal
 - Provide training with micro credential (optional)

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

13

Additional Collaboration

- ISU Extension: Hosting events, 4H connection, community ambassadors
- Local business and industry: Community ambassadors, hosting events.
- Security and IT groups: Opportunities for IT professionals to contribute to the cybersecurity curriculum and outreach materials.
- Cities, Counties, Libraries, and local ISPs: Public service videos, hosting events, promoting events.
- Connections: Connect with a wide network of cybersecurity professionals and educators through program events and conferences.

IOWA STATE UNIVERSITY

Public facing Educational and Interactive Content:

- Cyber House Rock
- Ask Captain Cyber
- · Adversarial News Network
- How things work
- Cyber Tales: Farmer Frankie, Alice in the Digital Wonderland (in design)
- All Creative Commons with attribution

Everything I need to know about cybersecurity, I learned on the playground!

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

15

Cyber House Rock

- Fun videos
 - Personal Security Practices
 - Be a Good Cyber Citizen
 - How Things Work
 - Cyber Threats
 - Cyber Adventures (mini-series stories)
- Tip sheets
- We can provide you with the MP4 versions

IOWA STATE UNIVERSITY

Center for Cybersecurity Innovation & Outreach

16

Call to Action

- It is time to have a community conversation about security literacy
 - •You are a trusted source within your community.
- Become a community ambassador
- Help support an ambassador student chapter
- Make security a culture in your community
- This is a long slow road
- Together we can reach all Iowans
